

<b>Branch</b>	<b>Description</b>	<b>Investment needed</b>
<b>IT</b>	They aim to give a cloud based, cross-platform software solution, to small, medium enterprises (SME) intending to keep the pace with the increasingly digital nature of organizing and managing a company, with a wide scope of functionality, which is still fully applicable with user level expertise, which is currently unobtainable. The novelty is a virtual assistant that guides businesses through digitization and as a result reshaping the organizations into a more streamlined form. This service software offers a new, innovative platform to help non-tech expert SMEs to digitise contract, invoice and HR management processes.	<b>EUR 1 million</b>
<b>IT, Architecture</b>	The novelty is a smart home system. The users can monitor their heating and electric system, control their devices and change their home environment from anywhere with their smart phone, and the devices of the company. After you attached your everyday household devices, you will be able to easily create rules and modes for your home to assist your lifestyle better, automatically. You can get a better, slower and more comfortable life in the securest way possible.	<b>EUR 1 million</b>
<b>IT, Fashion</b>	They use advanced photogrammetric technology based scanners to create a detailed virtual alter ego of the online shoppers. Using their 3D face and full body scanning technology every detail of the body is captured with accuracy. Shoppers use their own avatar to try on different clothes and then purchase them all in comfort of one single application. This highly personalized platform allows them to actually see whether an item fits (and suits) through their personal avatar.	<b>EUR 1 million</b>
<b>Media</b>	The main activity of the company is the international sale of a classical music talent show's brand licence, the main elements of which are television show licensing, merchandising, digital activity, record sales, book publishing, concerts, talent management and music school.	<b>EUR 3 million</b>
<b>Green Energy</b>	The main activity of the company is to produce pellet and also briquettes by utilizing the bark of the wood.	<b>EUR 1 million</b>
<b>Technology</b>	The main activity of the project is to create an interior and exterior localization solution, which is stable and well-functioning in the environment in a way to provide accurate localization and route tracking, with minimal infrastructure requirements, reliable and easily accessible sensors.	<b>EUR 1 million</b>
